Augie Luebbers

Pensacola, FL · hi@augie.gg · augie.gg · github.com/AugusDogus

I lead AMLI.com and built Ask AMLI, the company's internal AI assistant. On my own time I build and ship products, including a salvage yard search engine with paid plans and an end-to-end encrypted messenger.

Work Experience

Senior Software Developer, AMLI, via Provalus (Remote) Jan 2023 – Present

- Lead maintainer and primary point of contact for AMLI.com, responsible for architecture, reliability, and delivery.
- Designed and led the migration from Create React App to Next.js with TypeScript, Tailwind, tRPC, and shadcn/ui. The first migrated page cut Speed Index from 6.1s to 1.1s and Total Blocking Time from 2,940ms to 620ms.
- Designed and built Ask AMLI, an internal AI assistant with role-scoped access to company data, Power BI, and financial reporting. It rolled out company-wide in October 2026 and passed 120 active users in its first month.
- Architected the CI/CD pipelines in Azure DevOps and cut build and deploy time from over 30 minutes to about 6.
- Built the test suites: 110+ end-to-end Playwright tests on AMLI.com that run on every pull request and nightly, and 2,000+ automated tests on Ask AMLI.
- Instrumented AMLI.com with Sentry for error tracking, performance monitoring, and cache observability.
- Led the team's adoption of AI-assisted development: introduced Cursor and CodeRabbit, then convinced leadership to move to T3 Code on agent subscriptions as usage outgrew metered plans, and to enroll the whole team in MEGA.
- Reviewed code for and mentored developers at every level, senior engineers included, upskilling the team on TypeScript, React, and AI-assisted workflows. Interviewed developer candidates.
- Worked directly with Marketing, leadership, and external vendors to shape requirements and unblock delivery.

Software Developer, AMLI, via Provalus (Remote) Jun 2020 – Dec 2022

- Shipped floor plan, image, form, and tour scheduling features on the legacy React site.
- Rebuilt Prismic content caching on Redis with webhook invalidation, after which 503 downtime alerts fell from 24 in four months to near zero.
- Set up Dependabot on Azure Pipelines for automated dependency updates, and wrote and maintained unit tests.
- Resolved production issues, accessibility findings, and UI bugs, and helped teammates estimate sprint work.

Junior Software Developer, University of West Florida Jan 2017 – Jul 2019

- Designed and built a multi-platform Progressive Web App for web, Android, and iOS, used by faculty, staff, and students.
- Translated UI/UX designs into frontend components and tested the app for quality and correctness.

Projects

- **junkyardindex.com:** One search across salvage yard inventory nationwide, with alerts when a match arrives. 220k+ vehicles across 200+ yards and seven inventory networks, with paid plans.
- **whisp.chat:** Ephemeral photos, videos, and messages for close friends. End-to-end encrypted with MLS (RFC 9420) via OpenMLS in Rust, bridged to React Native.
- **opentab.sh:** Sends tabs between a browser and a phone. iOS, Android, and a browser extension on one tRPC API, with tabs arriving live over SSE.
- **multiplex:** Synced Plex watch parties, built after Plex retired Watch Together. Native GameCube and Wii clients in C (H.264 over HLS, TLS 1.2), in sync with web viewers.
- **Open source:** Upstream contributions to Bun, T3 Code, Tunarr, Electrobun, Portless, and swagger-typescript-api.

Technical Skills

- **Languages:** TypeScript/JavaScript, Rust, C, C#, Python, Kotlin, Swift, Zig
- **Frontend & Mobile:** React, Next.js, TanStack Start, Astro, Tailwind CSS, shadcn/ui, React Native, Expo
- **Backend & AI:** Node.js, Bun, Hono, Fastify, Express.js, tRPC, GraphQL, Effect, Better Auth, AI SDK, MCP
- **Data:** PostgreSQL, MS SQL, SQLite/libSQL, Redis, Prisma, Drizzle, Kysely, Algolia
- **Testing & Delivery:** Playwright, Sentry, PostHog, Git/GitHub, GitHub Actions, Azure DevOps, Vercel, Cloudflare, Docker
- **Also:** Unity, WebGL/GLSL, Ghidra, Linux desktop (GTK4, GNOME Shell)

Education

B.S. Computer Science (Incomplete), University of West Florida

Extracurricular Achievements

Eagle Scout, Troop 400 Feb 2017

Community member, t3.gg (Theo Browne) Twitch sub for 54 months
